

Wheat

1860

By: Daniela García

2020

Since the XIX century, the Chilean wheat production started growing, because of the opening of Californian and Australian markets. This production was essential in agriculture, and it increased a lot. But after the United States and Argentina lowered world cereal prices, Chile started losing its good selling. Nowadays in Chile wheat exportation has decreased, because of the lack of rain. But in conclusion, wheat always has been a good source of income for Chile, which is an important part of the agricultural economy.

Decreased production, lower earnings 20% less.

Mostly used for bread and pasta, essential for people's diet.

Just pulled out of the ground, it's not such a clean process.

Production highly concentrated in the southern regions.

Chepaer, people of every class can buy it, convenient for everyone.

Main buyers: South America, Perú.

Has great earnings.

Essential, but it is used for more things such as; beer, grits, sometimes in all kinds of drinks.

More processed and clean wheat.

Port of Valparaiso

1842

By: Daniela García

2020

The port of Valparaiso, also known as the "Emporio comercial del Pacífico"; started being a strategic port in 1830. Because boats were crossing the Strait of Magellan, and like the path was too long, they needed to leave their commodity in a safe place, so they left it on this port. Therefore, the country started exporting, and because of the arrival of too many foreign people, it was a great way of earning. Unfortunately, in the XX century, the earnings started to decrease, after the Pacific War, the opening of the Panama Canal, and the economic crisis in South America.

Center of
Exportation and
trades.

Small, less terrain, basic
contruction for only
some warehouses and
storing.

Exportation to
few countries, a
not so famous
port.

Administrated by
Emporchi.

Essential to Chilean
economy and one of
the main sources of
forgein trade.

Always
have been located
in Valparaiso.

Exportation, trades,
tourism and new
technologies.

New remodelations and
constructions,
technologies. Big space,
consume a great part of
the terrain.

New buyers and
new exporters.
