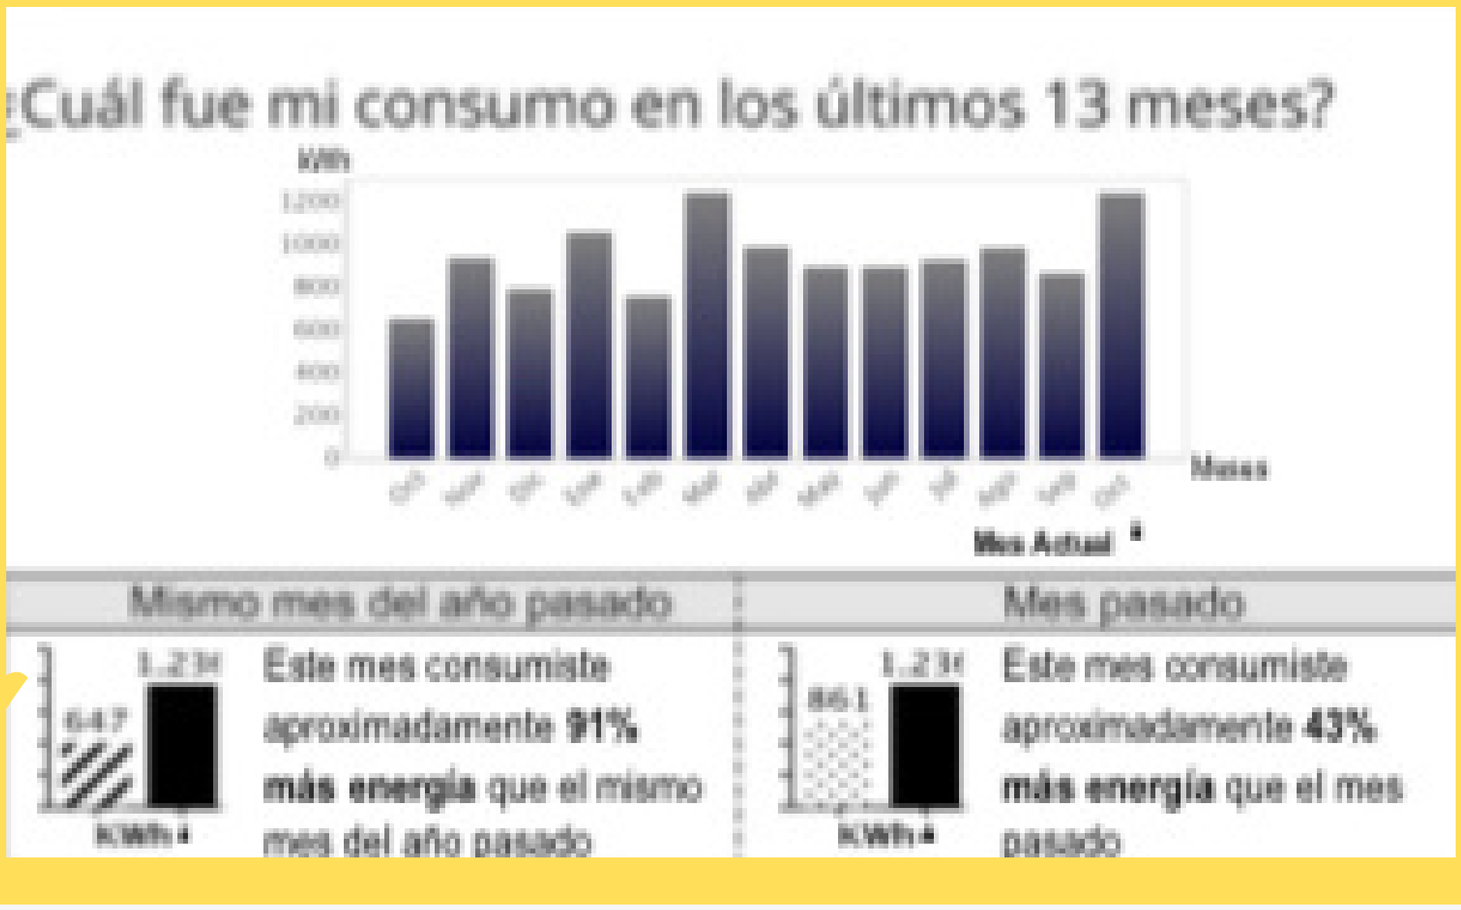
My light bill

by santiago gajardo



March and October with 1236 where the biggest month of use of kwh.

Oct of 2019 was the lowest use of kwh with 647.

589 kwh

Reasons

We turn on the light when we are not in that room.

We turn on our electronic devices when we do not use them

We turn on lights when we sleep

Solutions

in the night and afternoon, turn off all electronic devices and sleep or go to a walk

turn all our electronic things (lamps, electronic devices etc) when we are not using them

Dont use electronic things too much time
