# BACK IN TIME

*What Changes Make Our Mix?*

## ACID RAIN ISNT JUST FROM MOVIES!

The atmosphere is the Earth sphere that contains all gases on the planet. It has many layers and contains gases like oxygen and carbon dioxide. It is one of the most important spheres in our planet as it contains the air we breathe, which we cannot survive more than 5 minutes without it.

One of the main problems caused by humans affecting the atmosphere is acid rain. It is produced when humans burn fossil fuels to generate energy, this produces toxic gases that mix with vapor in the atmosphere which then returns to the earth as hail or snow that makes water and soil acid and toxic affecting agriculture, wildlife and humans.

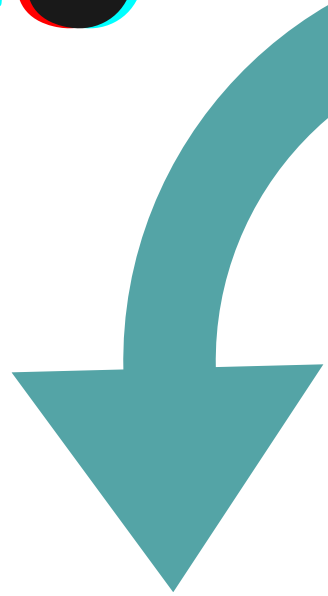

This is extremely bad for everyone | as it affects almost all living things. With less crops growing people and animals have less food to eat. We have less consumable water which is already scarce. This is one big problem that can be

avoided by making more environmentally friendly electricity.

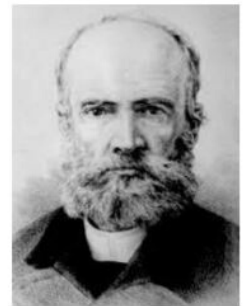

So, in conclusion we are taking advantage of one of our most important Earth spheres, and acid rain is an awfully bad event that can be avoided by using more friendly ways of energy.

# EARTH LAYERS

## CHARACTER INTERVIEW!

Graded TPA: **Diego** Barros Arana

**Why did you start Reading/writing books?**

I started writing books because when I was a young boy, I loved reading and I always wanted to write my own.

**Where have you worked in the education department? Your main operations.**

Well I worked in the Universidad de Chile and in the instituto nacional as my main ones, where I suggested and founded different ideas to help education

# INSTAGRAM POST

\_Arturazo.Pratt

Iquique, Chile

We were sailing in the beautiful Iquique sea, and in the distance, we saw a huge, magnificent metal boat with a Peruvian flag, I think it was the Huascar, but I do not know yet. If it is, we will destroy them in the pacific war! We will always win as chile is the best country!

Miguel\_graul.official

Yes Arturo that was us! You will not win with your tiny old wooden Esmeralda!

Peru will win!

# FUNNY MEME

When balmaceda realizes the  
legislatives have english machine guns

# MEME FUNNY

# What Changes Make Our Mix?

I THINK THE  
CHANGES THAT MAKE OUR MIX ARE THE DIFERENT PHASES  
AND CULTURES WE GO THROUGH,  
LIKE THE PACIFIC WAR THAT GAVE US MORE LAND WHICH  
GOT US MORE SALTPETER TO  
IMPROVE OUR ECONOMY AND MAKE CHILE BETTER, OR FOR  
EXAMPLE WHEN WE JOINED WITH  
RAPA NUI ADDAPTING THEIR CULTURE AND BELIEFS AND IN  
THE CUESTION SOCIAL WERE WE  
COULD LEARN FROM MISTAKES OF OVERPOPULATING A  
SECTOR OF THE COUNTRY, AND FOR ME  
ALL THESE CHANGES MAKE OUR MIX.

# Best learning Activities?

*I think the expert  
visits helped alot as  
the people  
talking about the topic  
had lots of experience  
and knowledge on the  
subject,  
also the earth layers  
TPA also helped me  
understand the layers  
so i could  
really represent them.*
