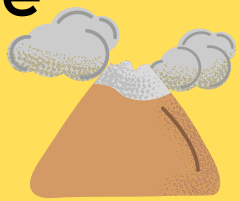
Energetic resources in our zone

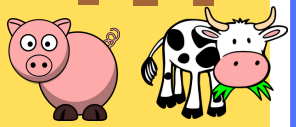


1: Geotermal

2: Eolic

3: Biomass

1: Foresty: Trees, plants.



2: Livestock: Pigs, cows.

3: Minery: Gold, cobre.

Dont play with electricity! Lets take care of it...

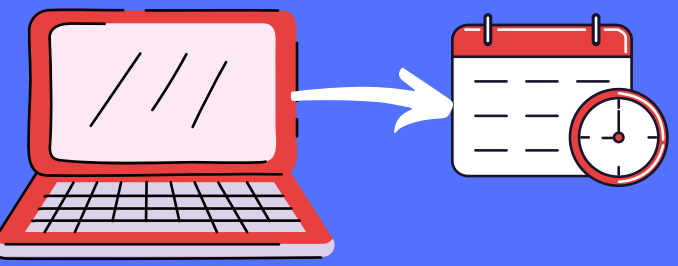
lets take care of electricity!

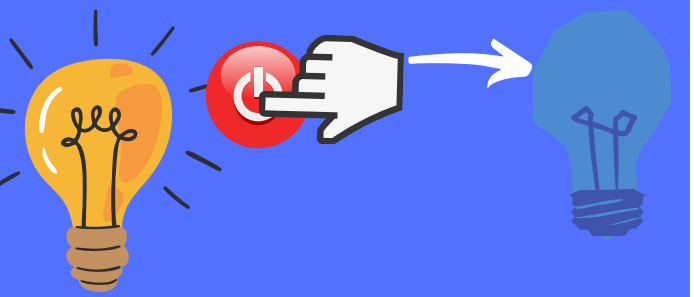
by: Santiago Gajardo

Guiding question:

How we can use electricity in a responsable way?

We can use electricity in a responsable way by turning off light when we are not using them, have schedule for our electronic devices etc.





My family use of electricity

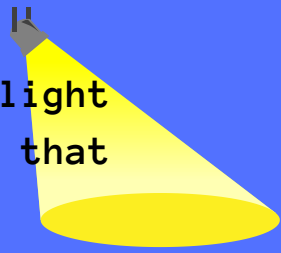
March and October with 1236 where the greatest months with use of kwh.

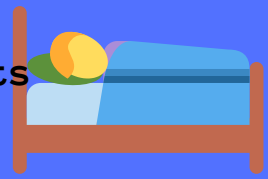
Oct of 2019 was the lowest month with use of kwh with 647.

The difference between this 3 months is 589 kwh

Possible causes of use of kwh

1: We turn on the light when we are not in that room.



2: We turn on our electronic devices when we do not use them.


3: We turn on lights when we sleep.
